## Zeus+ Injection Molded Cases

Our Zeus+ line of shielded cases have an enhanced interior surface which provides increased shielding capabilities over our traditional Zeus line. Ideal for safe transport of sensitive or critical electronics including tablets, laptops, communications equipment, sensors, or other computing systems. These lightweight and versatile solutions protect electronic equipment from both environmental and electromagnetic hazards, providing high dB levels of attenuation in the range of 10MHz to 20GHz. Available in a variety of standard sizes from small briefcase to large tote, our cases are also available in custom configurations.

GRAY

CAMO

### FEATURES

- Proprietary high-impact conductive resin protects contents from damage, is flame retardant, and self-extinguishing
- Meets MIL-STD 461/464 & 810G
- Provides the highest level of electromagnetic shielding
- Shielding is built into our high performance materials system and will never corrode, or degrade over time
- Gasket sealed construction protects contents from moisture, vapors, or other intrusion
- High impact latches and pressure release valves equalize interior pressure when opened
- Twin 5/32 inch padlock loops for additional security
- Contoured rubber grip handles
- Full-width stainless steel hinge and latch pins
- Available in gray or durable camo coatings
- Load-out cases are equipped with built-in 2" recessed wheels, retractable handle, and stainless steel twist lock latches
